

## **TPCDT- Maithon Power Limited organized awareness programme on water borne diseases**

- Dhanbad, August 10, 2016

~ Close to 40 workers sensitised on the preventive measures of water borne diseases ~

Tata Power Community Development Trust (TPCDT), has always strived hard in providing a safer and secured environment at its workplace. In continuation with the philosophy, TPCDT organised an awareness programme to sensitize the workers at the plant on the preventive measures of water borne diseases. The awareness programme was conducted under the strict supervision of a trained team from TPCDT-MPL.

The awareness programme on the water borne diseases and its preventive measures is another milestone in our journey reinstating TPCDT's commitment towards ensuring a healthy and hygienic environment in its workplace. The awareness programme have helped to sensitise close to 40 workers at MPL which in turn will help to spread the message of combating water borne diseases inside the plant and among the communities as well.

Speaking on the initiative, **Mr. K. Chandrashekar, CEO & ED - Maithon Power Ltd**, said, *"We, at MPL have always stressed for a healthy life for our populace. The awareness programme would not only help in sensitising our internal workforce, but also would help spreading the awareness on prevention of water borne diseases among the larger communities. TPCDT is thankful to the MPL team for successful implementation of the project and would continue to work closely with its workforce in bringing about positive change among its communities."*

The awareness programme was designed in an interactive manner to ensure proper percolation of the message of a safer environment. The awareness programme helped in spreading the message of combating the menace of water borne diseases and the ways it is transmitted along with its symptoms. The participants were also handed over modules of Do's and Don'ts on water borne diseases which proved to be of immense help for them.

TPCDT is committed towards the better health of its communities and such awareness and training programmes further helps in driving the message strongly among its communities. TPCDT would continue to work closely with its communities and ensure a long and sustained relationship with them.
